

Rossignol High School Following Their Voices

What's happening with FTV at RHS?

RHS Students Find a Cure for the Common Cold and Cancer!

Our Land Based Learning programming is a big part of FTV. By partnering with community Knowledge Keepers and viewing the “Land” in traditional Metis ways, age-old remedies are rediscovered. As students embark on a medicine walk, they are guided to look high and low! Medicines abound.

RHS staff and students learn together on the Land with Knowledge Keeper guidance.

RHS Excels as FTV VERSO Pilot School!

As an FTV VERSO pilot school, RHS staff listen to students' voices and strive to enhance the learning journey together. By using the real-time VERSO check-in tool, students communicate successes and challenges with their teachers. With the help of FTV's VERSO, staff are able to view unique and detailed student perspectives. Next, teachers micro-adjust lessons to help the students reach the next level of learning. VERSO's RUBRIC tool enables teachers to instantly create learning RUBRICS that guide student learning no matter where they are on the learning journey.

Student understanding of the learning focus - Whole School

Verso Check-in Question: What are you learning today?

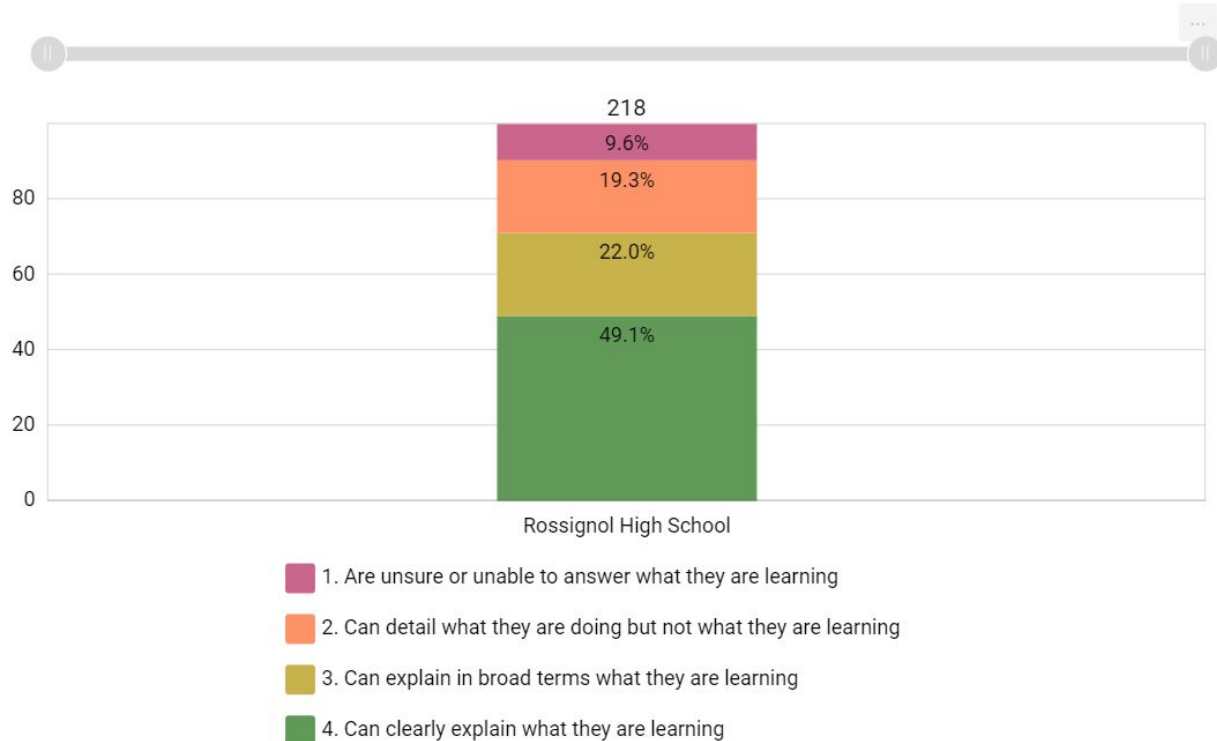

- 1. Are unsure or unable to answer what they are learning
- 2. Can detail what they are doing but not what they are learning
- 3. Can explain in broad terms what they are learning
- 4. Can clearly explain what they are learning

Here is where we started in September.

Student understanding of the learning focus - Whole School

Verso Check-in Question: What are you learning today?

Notice the growth in student's ability to articulate their learning. A rapid improvement in only a few months!
